

Anne-Lise Laurain is our European lead for Incubatenergy. Her role is to drive the development of EPRI's open innovation program in Europe and to connect startups with Utilities to run innovative demonstration projects. She has a holistic view of the energy industry thanks to her 10-year working experience with multinational company (ABB), electric utility (PG&E), startups (Power Assure and Bia Power), and cleantech accelerator program (Cleantech Open). Her areas of expertise include data analytics for the grid, EV, Energy efficiency, startup development.... Anne-Lise is a French engineer in Fluid dynamics from INP Toulouse ENSEIHT with a MSc in Sustainable Energy Futures from Imperial College London and has MBA from ITU San Jose, California.
