

Gabriella Carini is the Director of the Instrumentation Division and a Senior Scientist at Brookhaven National Laboratory (Upton, NY, USA). Dr. Carini is the chair of Brookhaven's QIST working group. She spearheaded the effort to develop the QIST laboratory in Instrumentation Division with focus on quantum network research. Throughout her career she performed her research at various facilities and national laboratories around the world including her PhD at BNL. Dr. Carini has extensive research experience in advanced instrumentation, system development, microelectronics, and technology. She serves in several panels, conference and review committees, and has collaborations with many institutions - national labs, industry, and academia. Her work has produced more than 150 publications and two patents.
