

As Corporate Strategy & Innovation professional, **Jérémie Bougé** works on a corporate innovation program to shape the future of Siemens Energy's digital services.

He and his team collaborate with various customers and partners to launch Minimum Viable Products (MVP) that can optimize plant performance, maximize their profitability and minimize carbon footprint.

He began his career at Siemens Energy 12 years ago. In his last position he was heading the digital services sales for Europe and Africa.

Jérémie is an MBA candidate of the ESMT Business School and he holds master's degree in Mechanical Engineering from the University of Siegen, Germany.
