

Jeremy leads TVA's Technology & Innovation organization and is responsible for TVA's enterprise technology and innovation strategy, along with the technology planning, operational, cybersecurity, and support functions.

His organization is currently leading TVA's enterprise-wide digital transformation effort, aimed at increasing the performance of TVA's assets and improving the safety and productivity of TVA's employees, through applying technology to modernize how we innovate, operate and work through the company.

Prior to being named VP & CIO in February 2019, Jeremy gained a broad spectrum of electric utility experience through service in a variety of roles throughout the Transmission, Power Operations, Office of the CEO, IT, and Finance organizations. The opportunities these roles afforded him provided firsthand experience in business-critical functions, including: system operations, asset portfolio management, strategic planning, and organizational development.

Jeremy holds a bachelors degree in marketing and an MBA from the University of Tennessee at Chattanooga, and has completed the executive business program at Vanderbilt University. He also serves in a number of community organizations, including the Chattanooga Chamber's Leadership Chattanooga program, and as a board member for the CHATech non-profit organization.
