

Dr. Kyri Baker received her B.S., M.S., and Ph.D. in Electrical and Computer Engineering from Carnegie Mellon University in 2009, 2010, and 2014, respectively. From 2015 to 2017, she worked at the National Renewable Energy Laboratory. Since Fall 2017, she has been an Assistant Professor at the University of Colorado Boulder and is a Fellow of the Renewable and Sustainable Energy Institute (RASEI). She is an NSF CAREER award winner and led an award winning ARPA-E Grid Optimization team. Her research focuses on computationally efficient optimization and learning algorithms for energy systems ranging from building-level assets to transmission grids.
