

Dr. Liang Min is the Managing Director of the Bits & Watts Initiative at Stanford University. Bits & Watts is a Stanford initiative bringing together multi-disciplinary research teams to enable digital transformation for the 21st century electric grid. Prior to joining Stanford, Liang has worked at the Lawrence Livermore National Laboratory since 2011, as the founding group leader of the energy delivery group and associate program leader for the national lab's cyber & infrastructure resilience program. He was the Research Director for Livermore's CES-21 Electric Operations program and had previously worked at the Electric Power Research Institute (EPRI) as a senior project manager. Liang earned his Ph.D. in electrical engineering from Texas A&M University in 2007. He holds two U.S. patents in voltage stability assessment.
