

Marie-Luce Picard joined Teradata beginning of 2017 and went through different positions from Principal Delivery Lead to Head of Industry Consulting and Data Science in France. She is now in charge of Utilities Practice for EMEA region.

Marie-Luce's career has always been focused on data, aiming to enhance innovation and drive business opportunities through data analytics. Before joining Teradata, Marie-Luce has worked for 25 years in EDF Labs where she acquired significant experience on data analytics, supporting all BU of EDF Group (generation, grid, energy management, retail).

She is also a trainer in different institutions, one of them being CentraleSupélec Exed in France (Big Data Executive Certificate).

Finally, she is an expert at the European Commission for auditing H2020 Horizon collaborative projects.
